

# ATTENTION YOUNG ARTISTS!!

## Summer Art Contest

### How to draw the Bullfrog:

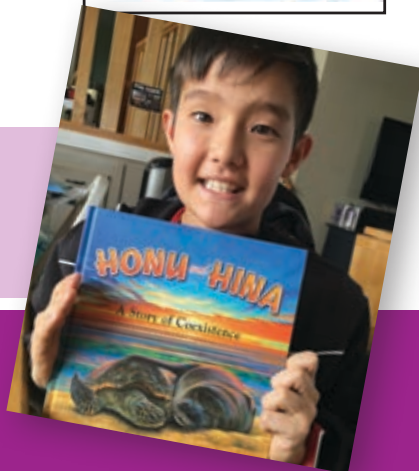

They are smooth and green skinned compared to toads that are brown and bumpy skinned.

Bullfrogs were brought to the islands as a source of food.

**Step 1:** First form up the frog using ovals and circles. Remember to press softly at this stage in case you need to erase lines.

**Step 2:** Next outline the frog adding details at this stage.

**Step 3:** Finally color the frog using crayons or colored pencils. Tada!
